

Visiting the Steven F. Udvar-Hazy Center at the National Air and Space Museum

MORNING
AT THE MUSEUM

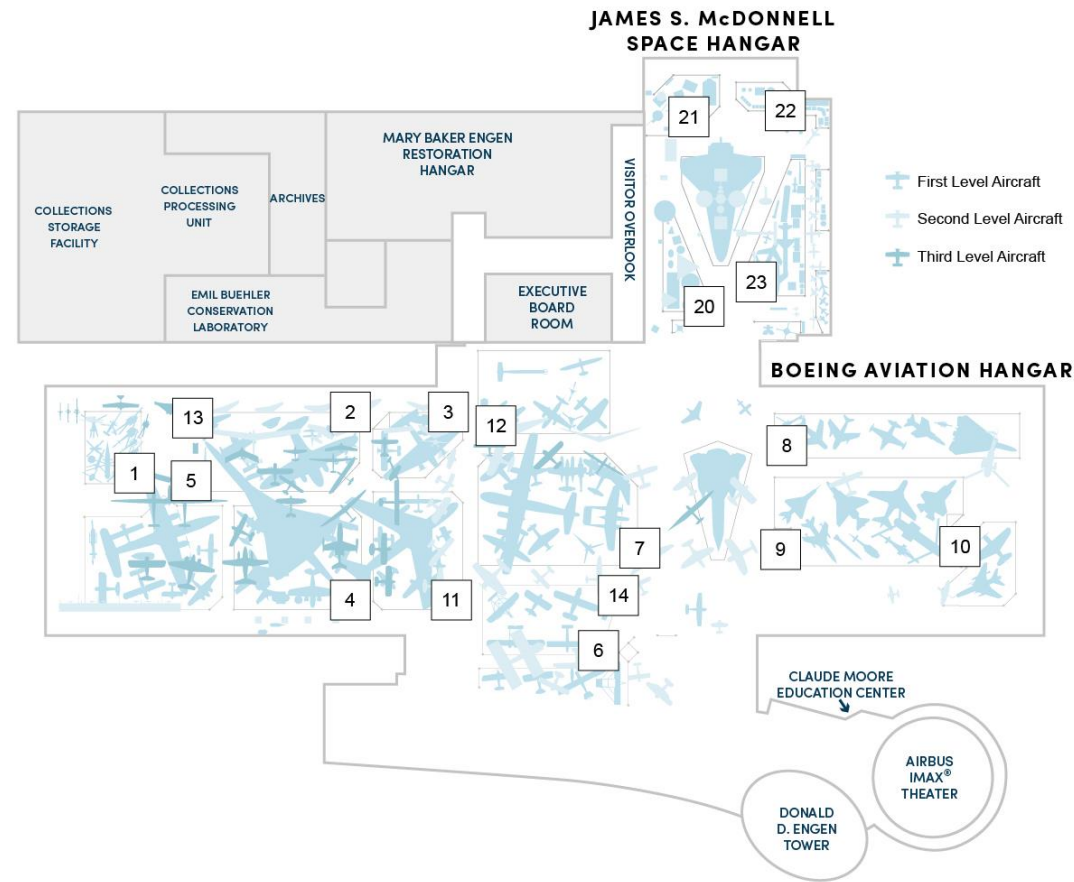

Smithsonian Institution

The Udvar-Hazy Center is a big building with many things to see.

The museum has maps that visitors can use to find what they want to see.

The Boeing Aviation Hangar has many airplanes that visitors can explore.

Inside the hangar, there are many airplanes.
Some are on the floor and some are in the air.

Some of the airplanes are big and others are small.

Many of the airplanes are very old, so visitors should look with their eyes but not touch.

The hangar is very large, so visitors have a lot of room to move around.

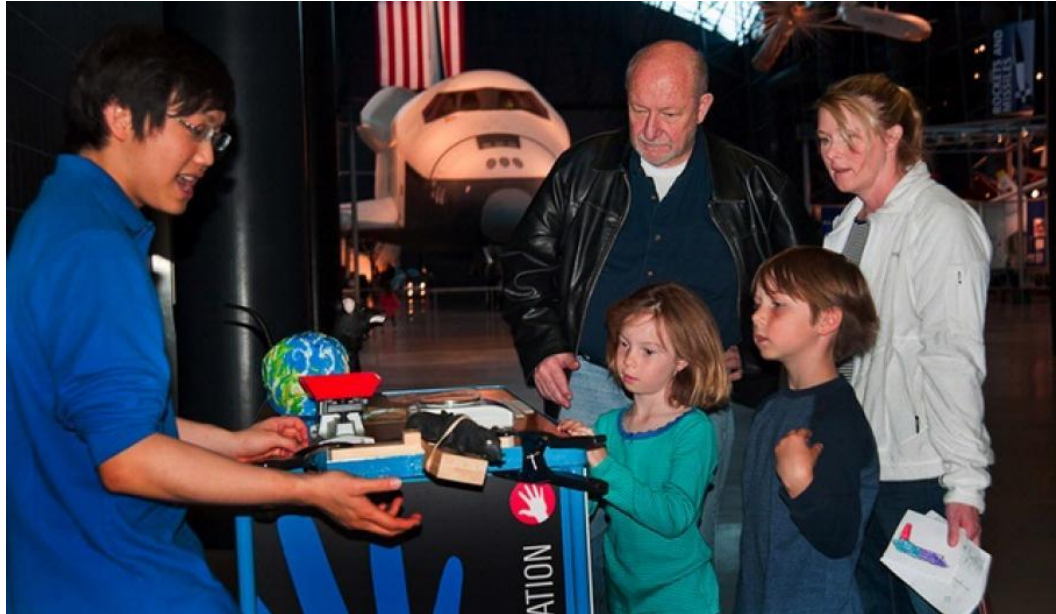

Sometimes the museum is crowded. Visitors can find a quiet space or wear headphones if it is too loud.

The James S. McDonnell Space Hangar has the Enterprise Space Shuttle.

Sometimes there are discovery stations that have objects visitors can touch and explore.

Visitors can ask the museum staff and volunteers for help if they have a question.

The Steven F. Udvar-Hazy Center is a big museum. Visitors can look at a map, ask a staff member for help, find quiet areas, and see many airplanes.
